This is only an *example* of what the Salary Survey includes.

The survey is broken down into position title, building size and then building class (the above example is for all the property administrators that participated and then just those in buildings that are 500,000 square feet or less).

Please note that only Houston BOMA members that participate in the survey are able to receive the survey once it is compiled and completed.

The above graph is another *example* of the trending data that is on the annual salary survey.
